The Challenge

Machine to Machine (M2M) connectivity and network services can present challenges when they require you to build your own solution for multiple carrier platforms. This often results in a difficult to leverage model that can be bulky, hard to manage and slow to respond. When you factor in multiple technologies and countries, costs quickly escalate.

What are Numerex Network Solutions?

Numerex Network Solutions reduce the complexity of managing M2M assets across multiple networks and technologies by consolidating multiple connectivity service offerings into a single, flexible cloud-based management system.

Intuitive Portal	Secure access to full featured account and subscription management
Rapid Automation	Provisioning and management APIs with individual or batch transactions
Multiple Services	2G, 3G, 4G-LTE, CDMA, International, and Satellite
Reliable Platform	Dual, geographically dispersed data centers
Responsive Support	Prompt, reliable support from an expert staff available 24x7x365

Purpose Built Solutions:

Numerex Network Solutions Enable:

Opportunity	Rapid introduction of new market opportunities and geographies
Simplicity	Lower cost of a simplified, consolidated operations and commercial model
Profits	Increased profitability from improved connection visibility and utilization
Service	Higher service availability from a secure, reliable, carrier-grade architecture

Platform Capabilities

 <p>Comprehensive Coverage</p> <p>Over 200 Countries Satellite and Cellular Multi-Carrier Support</p>	 <p>Reliable, Scalable, and Secure</p> <p>Redundant Data Centers High Availability Architecture Secure, Reliable, and Encrypted</p>	 <p>Process Automation</p> <p>Powerful Interfaces Subscription Management Single or Bulk Transactions</p>
 <p>Web Access Numerex Portal</p> <p>Subscription Management Business Analytics Dashboard Metrics</p>	 <p>Business Management Tools</p> <p>Usage Monitoring and Alerts Detailed Reports Extended Life-Cycle Support</p>	<p>NOC</p> <p>Network Operations Center</p> <p>24x7x365 Support Staffed by M2M Specialists Proactive Systems Monitoring</p>

Powered by Numerex FAST®

Numerex Network Solutions are powered by Numerex FAST®, a cloud-based, highly scalable, horizontal service delivery platform complemented by an intelligent, web-based management portal.

The Solution

Because change comes quickly, Numerex Network Solutions enable flexible, adaptable, and scalable solutions that simplify the complexity of M2M deployments. Numerex offers world class support for your M2M investments with an upgrade path where a single platform supports multiple technologies – today and in the future.

A network connectivity management system that offers the agility required to securely manage assets and make informed decisions, Numerex Network Solutions are a powerful platform that enable the M2M ecosystem, allowing you to manage and monitor any asset almost anywhere in the world.
